

# JumpStart® Leap Frog®

*Supra-malleolar (SMO) trimline, PF free, DF free*

CASCADE<sup>®</sup>  
daFO<sup>®</sup>

The JumpStart Leap Frog was developed to help young children with correctable moderate to strong pronation or supination to re-align their base of support for improved stability in standing and walking. Full wrap-around flexible support encompasses the foot and ankle for pronation and supination control. A well-defined plantar surface and wrap-around compression provide proprioceptive input. Solid outer foundation adds extra arch support and heel stability. The SMO trimline gently guides medial/lateral ankle alignment and fully encompasses the heel and forefoot for excellent alignment control.

## Key Features

### Open ankle trimline

allows for free dorsiflexion and plantarflexion movement.

### Solid outer foundation

provides additional support and heel stabilization.

### Full wrap inner liner

made from soft, thin polyethylene plastic allows full alignment control of the heel, mid-foot, and forefoot.

### Choice of two outer foundation materials

Polyethylene for moderate flexibility or co-poly for firm support.

### Prefabricated

sized by measurement using the Fast Fit sizing jig.

**Widths:** Wide and Narrow

**Sizes:** 4.00 – 9 inches (0.25 inch increments)

## Designed for patients who:

- Exhibit a fully correctable foot position and fit within the product size range.
- Present with moderate to strong pronation or supination and associated gait instability.
- May benefit from the sensory feedback provided by a fully contoured foot bed.
- Require access to free dorsiflexion and plantarflexion.

Pink

**No casting needed!**
